Need expert guidance on a land development project?

No problems, only solutions.

GRM have been providing assistance to developers, land owners and house builders (both large and small) nationwide for over 25 years. Whether your challenge relates to land or groundwater contamination, coal mining hazards, landfill gas or foundation design, we can help.

GRM provide development services and solutions to the following market sectors: Commercial, Retail, Residential (both private individuals and large PLCs), Public Sector, Education, Healthcare, Leisure, Transport

We can often demonstrate that a perceived problem is not really a hazard to the development, so for the client, a small investment in ground investigation can return many times its value in terms of cost savings.
