

HEALTHCARE SECTOR

Development Support Services for the Healthcare Sector

OVERVIEW

With over 34 years of experience and more than 11,000 successful projects completed, including a significant number within the healthcare sector, GRM is a trusted partner in land development and ground investigation services. Our continued success is built on a deep commitment to understanding the unique needs of each client and delivering tailored, cost-effective solutions.

GRM's expertise is especially valuable in sensitive environments such as live healthcare sites. Our project and site teams work closely with each NHS hospital and Trust to minimise disruption and maintain safe access for staff, patients (some of whom are vulnerable) and the public, including while working in close proximity to high-precision medical equipment.

A testament to our performance is the loyalty of our clients: over 75% of our projects come from repeat business. In the healthcare sector, that figure rises to over 95%, reflecting the confidence clients place in our ability to collaborate with multidisciplinary teams and stakeholders and deliver expert, independent advice.

GRM provides a complete range of land development services—from initial desk studies and ground investigations through to geotechnical and foundation design, soils re-use and disposal strategies, and on-site services such as foundation, gas protection, and remediation inspections.

Whether you're at the earliest planning stages or managing ongoing construction, GRM are here to support you every step of the way.

TRUSTS AND HOSPITALS WE HAVE WORKED WITH:

- ▶ Stockport NHS Foundation Trust
- ▶ The Christie NHS Foundation Trust
- ▶ Midlands Partnership NHS Foundation Trust
- ▶ Lincolnshire Partnership NHS Trust
- ▶ Northern Care Alliance
